EDUCATION

PhD Information Systems
EID-URJC · 2022–Present

MSc Cybersecurity + Security Auditor
Esneca · 2025–2026

HPS — Security Personnel Clearance
CNI

MSc Computer Graphics & VR
URJC · Sept 2021 – Mar 2022

BSc Computer Engineering
URJC · Sept 2016 – Jun 2020

English C1
Official Language School · Sept 2020

IT Director and doctoral researcher who bridges business execution with academic innovation. I lead Spika Tech's technology strategy while conducting PhD research on early Parkinson detection through VR and AI. I have hands-on experience in European Defence Fund projects in consortia with Indra, Airbus, Thales and Leonardo — the profile for organisations seeking technology leadership with a vision for the future.

PROFESSIONAL BACKGROUND

IT Director

Spika Tech, S.L.

Dec 2024 – Present

- Definition and execution of corporate technology strategy
- IT team management; availability, performance and platform evolution KPIs
- Evaluation and integration of AI, VR and blockchain into the business roadmap
- Technology KPI dashboard definition and quarterly executive board reporting

Project Manager — European Defence Fund

Spika Tech, S.L.

Sept 2023 – Present

- Technical representation in EDF consortia: CASSATA, SESIOP and EISNET
- Direct liaison with Indra, Airbus, Thales and Leonardo; EU compliance and deliverables
- Presentations to EU evaluation committees; international team coordination
- EU budget management and financial compliance oversight before the European Commission

Web Development Lead — Blockchain & Training Platform

Spika Tech, S.L.

Apr 2022 – Dec 2024

- Fullstack architecture and development of blockchain and training apps
- Development team leadership; process automation and CI/CD

ML Engineer — Sensors & Radar (RMMS)

SABIO Group / Spika Tech

Nov 2021 – Apr 2022

- ML models on military sensors and radar data; full Python / Anaconda pipeline

DOCTORAL RESEARCH — HIGH-IMPACT R&D

Early Parkinson detection through VR and AI

EID-URJC · PhD in Information Systems · 2022 – Present

Design and development of Unity simulations with Leap Motion Controller for hand-movement capture. Application of ML (MediaPipe, Python) to identify predictive motor patterns of Parkinson's disease. MotionInsight Hub project. Research at the crossroads of HCI, digital health

WHY CARLOS RODRIGO RIVERO

Unique triple profile:

Developer → Project Manager → IT Director. Full end-to-end visibility of the technology business.

Top-tier EDF consortium:

Active collaboration with Indra, Airbus, Thales and Leonardo on European defence projects.

Social-impact research:

Early Parkinson detection using VR — where technology genuinely saves lives.
